

# PSH (inch version)

Pneumatic · 2-Finger Parallel Grippers · Long-stroke Grippers

**Sizes**  
22 .. 52

**Weight**  
0.77 kg .. 8.05 kg

**Gripping force**  
320 N .. 1760 N

**Stroke per finger**  
14 mm .. 64 mm

**Workpiece weight**  
1.60 kg .. 8.80 kg

## Application example

Rapid loading and unloading unit on a swivel head base. Due to the sturdiness of this unit, it is particularly suitable for use in machine tools.

**1** PSH 22-2 2-Finger Parallel Gripper

**2** PSK 34 Swivel Head

### Long-stroke Gripper

2-Finger parallel gripper with long jaw stroke and dirt-resistant round guides

### Area of application

for slightly dirty working environments and a broad range of parts

### Your advantages and benefits

#### High maximum moments possible

suitable for the use of long gripper fingers

#### Dirt-protected circular round guides

sealed, for long strokes

#### Attached to two gripper sides with centering

for universal and flexible gripper mounting assembly

#### Air supply via hose-free direct connection or screw connections

for the flexible supply of compressed air in all automation systems

#### Comprehensive sensor accessories

for diverse monitoring tasks and stroke position monitoring

### General information on the series

#### Working principle

Pneumatic double piston system synchronized by rack and pinion principle

#### Housing material

Aluminum alloy, hard-anodized

#### Base jaw material

Aluminum alloy, hard-anodized

#### Actuation

Pneumatic, with filtered compressed air (10 µm): Dry, lubricated or non-lubricated  
Pressure medium: Required quality class of compressed air according to DIN ISO 8573-1: Quality class 4

#### Warranty

24 months

#### Scope of delivery

Centering sleeves, O-rings for direct connection, assembly and operating manual with manufacturer's declaration

#### Maintenance of gripping force

possible with SDV-P pressure maintenance valve

### Sectional diagram

- 1 Base jaw**  
for the connection of workpiece-specific gripper fingers
- 2 Kinematics**  
rack and pinion principle for centric gripping

- 3 Housing**  
weight-reduced through the use of a hard-anodized, high-strength aluminum alloy

- 4 Round guides**  
sealed, for long strokes

### Function description

The application of pressure on the pistons sets the base jaws, each of which is secured to the piston and the rack, in motion. The jaw stroke is synchronized by means of rack and pinion kinematics.

### Options and special information

**Finger position**  
can be monitored by magnetic and/or inductive proximity switches. Unsynchronized version available on request as a special design.

### Accessories

SCHUNK accessories – the suitable complement for the highest level of functionality, reliability and controlled production of all automation modules.

Centering sleeves

Fittings

MMS magnetic switch

IN inductive proximity switches

### Quentes plastic inserts

### HKI gripper pads

### SDV-P pressure maintenance valves

W/WK/KV/GK sensor cables

V sensor distributors

FPS flexible position sensor

① For the exact size of the required accessories, availability of this size and the designation and ID, please refer to the additional views at the end of the size in question. You can find more detailed information on our accessory range in the "Accessories" catalog section.

### General information on the series

#### Gripping force

is the arithmetic total of the gripping force applied to each base jaw at distance P (see illustration), measured from the upper edge of the gripper.

#### Finger length

is measured from the upper edge of the gripper housing in the direction of the main axis.

#### Repeat accuracy

is defined as the spread of the limit position after 100 consecutive strokes.

#### Workpiece weight

The recommended workpiece weight is calculated for a force-type connection with a coefficient of friction of 0.1 and a safety factor of 2 against slippage of the workpiece on acceleration due to gravity g. Considerably heavier workpiece weights are permitted with form-fit clamping.

#### Closing and opening times

Closing and opening times are purely the times that the base jaws or fingers are in motion. Valve switching times, hose filling times or PLC reaction times are not included in the above times and must be taken into consideration when determining cycle times.

# PSH 22 (inch version)

## Pneumatic · 2-Finger Parallel Grippers · Long-stroke Grippers

### Gripping force, I.D. gripping

### Gripping force, O.D. gripping

### Finger load

① Moments and forces apply per base jaw and may occur simultaneously.  $M_y$  may arise in addition to the moment generated by the gripping force itself. If the max. permitted finger weight is exceeded, it is imperative to throttle the air pressure so that the jaw movement occurs without any hitting or bouncing. Service life may be reduced.

## Mounting kit for proximity switch

The mounting kit consists of brackets, switch cams and the associated mounting materials. The proximity switches must be ordered separately.

Description	ID
HG-PSH 22-1	0300754
HG-PSH 22-2	0300755

## Mounting kit for FPS

The FPS flexible position sensor can distinguish between five freely programmable ranges or switching points for the stroke of a gripper and can be used in conjunction with a PC as a measuring system.

Description	ID
AS-PSH 22-1	0301736
AS-PSH 22-2	0301737

You can find more detailed information and individual parts of the above-mentioned accessories in the "Accessories" catalog section.

### Sensor system

#### End position monitoring:

### Main views

The drawing shows the gripper in the basic version with closed jaws, the dimensions do not include the options described below.

① The SDV-P pressure maintenance valve can also be used (see "Accessories" catalog section) for I.D. or O.D. gripping as an alternative or in addition to the spring-loaded, mechanical gripping force safety device.

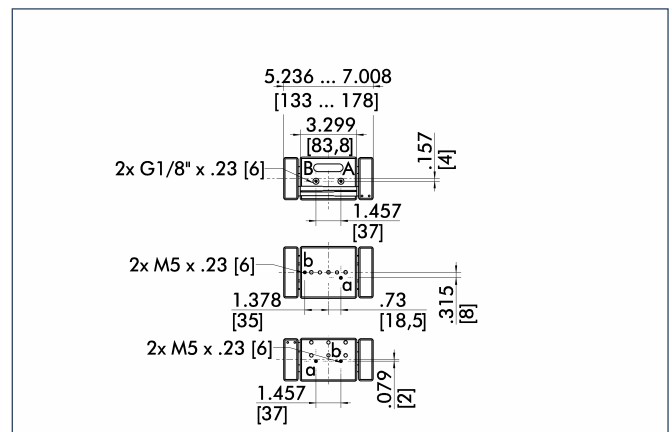

### Hoseless direct connection

- ③ Adapter
- ④ Gripper

The direct connection is used for supplying compressed air to the gripper without vulnerable hoses. Instead, the pressure medium is fed through bore-holes in the mounting plate.
